DOOR WITH RECOVERY TIME		INTERLOCKING SOLUTIONS FOR ROLL-UP DOORS	
INTERLOCKED DOORS WITH ACCESS CONTROL		AIRSHOWERS	
2-10 INTERLOCKED DOORS		PASSBOX	
INTERLOCKING SOLUTIONS FOR AUTOMATIC SLIDERS			

Easy passbox installation!

Manage your pass box with Cellular Lock® control boards!

With Cellular Lock® control boards you can set different recovery time for two doors and manage UV lamp or blower activation. All settings are made by dip switches, and wiring with RJ 45 connectors and screw terminals.

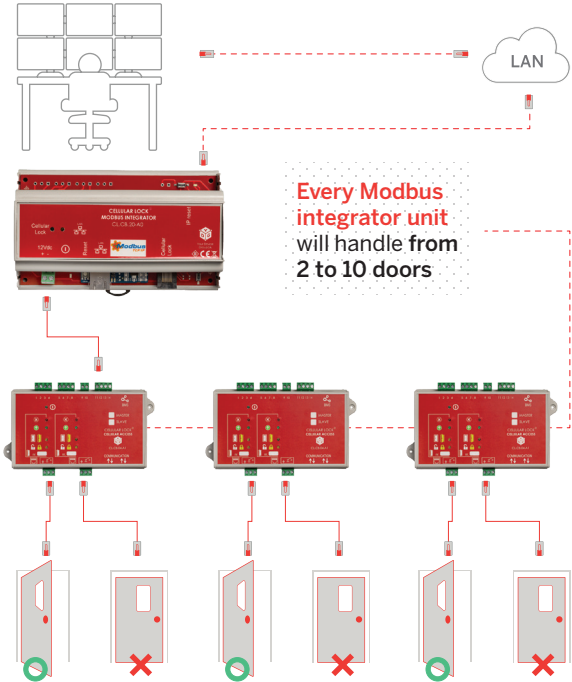

UV LAMP Passbox with UV lamp		DOUBLE DECK PASSBOX One controller can handle 4 doors in the same double deck passbox	
BLOWER Passbox with blower			
RECOVERY TIME Passbox with different recovery time		ACCESS CONTROL Passbox with access control	

Cellular Lock® control boards manage all situations of interlocked doors, from the simplest 2 door airlock up to interlocks with access control integration, fan, UV lamp piloting and automatic door interlocking.

Connectivity is a must!

BMS controlled door interlock through Modbus TCP

Modbus integrator is an easy and simple solution to interface Cellular Lock® system with Building Management Systems using Modbus TCP protocol. Modbus Integrator offers control and monitoring of all door parameters such as door status, lock status, recovery time, anomaly recognition, etc

Choose your style!

Custom accessories made for you: choose and personalize your product!

YDG offers a wide range of accessories such as traffic lights both for wall mounting and door frame mounting, electric locks, doors status sensors etc. All YDG accessories are fully customizable and they have RJ 45 connectors for easy installation. **NEW** Laser marking with colors.
